Preferred and Impaired Risks

Some categories of individuals who may qualify for Preferred Underwriting include:

- ▶ Most commercial and business pilots for U.S.-based airlines.¹
- ▶ Clients who plan to travel to most foreign countries for three months or less annually (business or pleasure).²
- ▶ Scuba divers who dive up to 100 feet.
- ▶ Individuals with cholesterol/HDL levels up to and including 6.0, even if on cholesterol-lowering medications.³
- ▶ Male/Female 6'0", ages 18–59, up to 213 pounds, BMI up to 29.¹
- ▶ Male/Female 6'0", ages 60 and over, up to 228 pounds, BMI up to 31.¹

Some categories of individuals who may qualify for our advantageous Non-Smoker Plus ratings include:

- ▶ Cigar/pipe smokers and smokeless tobacco users.
- ▶ Nicotine patch or Nicorette Gum users.
- ▶ Individuals with cholesterol/HDL levels up to and including 7.0, even if on cholesterol-lowering medications.³
- ▶ Male/Female 6'0", ages 18–59, up to 242 pounds, BMI up to 33.
- ▶ Male/Female 6'0", ages 60 and over, up to 294 pounds, BMI up to 40.
- ▶ Private pilots age 25 or older with more than 600 hours in total flight time and between 30 and 300 hours per year.

We look for the best possible impaired risk treatment for clients with:

- ▶ Atrial fibrillation.
- ▶ Breast cancer.
- ▶ Bladder cancer.
- ▶ Thyroid cancer.
- ▶ Coronary artery disease.
- ▶ Cerebrovascular disease.
- ▶ Diabetes mellitus (adult onset).
- ▶ Asthma.
- ▶ Mood disorders.
- ▶ Prostate cancer.
- ▶ Hepatitis C.
- ▶ Build.
- ▶ Elevated liver function tests.

And that's not all! Pru also offers:

- ▶ Age Last Birthday rates (not nearest)!
- ▶ Full commissions on special class ratings; partial on temporary extra ratings [subject to Commissionable Target Premiums (CTP)].
- ▶ No Problem Underwriting:
 - No MD examinations (Paramedic exam may be required)⁴
 - Treadmill ECG testing is NOT automatically required!
 - No inspection reports.
 - No chest X-ray.
- ▶ Our popular "Rx for Success" newsletter now available on www.pruxpress.com.
- ▶ Our regularly updated "Working Document" Medical Underwriting Manual.
- ▶ Plus, we now accept insurance exams up to 12 months old.

EXAM SHELF LIFE

EXAM	Ages 0–70	Ages 71+
Exam	Up to 12 months	Up to 6 months
Blood & Urine Specimen	Up to 12 months	Up to 6 months
EKG	Up to 12 months	Up to 12 months

¹ These scenarios could qualify for Preferred Best. Ages 18–59, up to 228 pounds, BMI up to 31 and ages 60 and over, up to 258 pounds, BMI up to 35 can qualify for Preferred Non-Tobacco rates.

² This does not apply to foreign countries Prudential considers to be extremely hazardous.

³ Total cholesterol readings of 300 or higher may not be eligible for Preferred underwriting regardless of Cholesterol/HDL ratio.

⁴ MD exams may be required based upon underwriter discretion.

Exceptional Capacity

At Prudential, our retention limit is up to \$30 million on fully underwritten single-life policies, and up to \$35 million on second-to-die policies. These limits enable us to issue policies up to \$65 million for most single-life and second-to-die life insurance products. These retention limits are likely the highest you'll find anywhere.

Ready and able to handle your large cases quickly ...

We can automatically issue a single-life insurance policy up to \$65 million without having to delay the process by discussing the risk with reinsurers.

... and go beyond when you need us to.

For cases that exceed \$65 million, we have facultative relationships with most of the major reinsurers. Plus, we can now offer an additional \$35 million of facultative capacity as a result of being a participant in the SuperPoolSM established by a major reinsurance company.

PRUDENTIAL'S RETENTION LIMIT	
\$30 million	Single-life policies
\$35 million	Second-to-die policies
PRUDENTIAL'S AUTOMATIC ISSUE LIMIT	
\$65 million	Most single-life & second-to-die policies

Rating reductions

Ratings are imposed on a policy at issue when some aspect of the insured's health, occupation, lifestyle, or any combination of these factors presents an element of excess risk to the company. When these elements no longer exist or if health improves, the client may qualify for a rating reduction.

- ▶ General Ratings Reduction Information:
 - Rating reductions are generally available after the second policy anniversary.
 - It is important to review the modification letter sent with the policy to determine if the client qualifies for a reduction.
 - Full underwriting, which includes callbacks, examinations, and possibly medical records, are required.
 - In certain instances (e.g., smoking, ratings for height and weight, occupation, and aviation, etc.), reductions may be considered after the first policy anniversary.
 - Evidence of insurability (full underwriting) is usually required.
 - While rate reduction considerations are possible after the first policy anniversary for height and weight, the policy has to have been issued as a rated contract (Tables A through H).
- ▶ Ratings Reductions for Preferred Categories:
 - Reclassification in the Preferred categories is generally available after the second policy anniversary.
 - Evidence of insurability is needed and requires full underwriting.
 - It is important to note that the one-year waiting period does not apply to policies issued in one of the Preferred categories due to height and weight (PNT, PS, NSP, NS). The waiting period for such contracts is two years.
 - Prudential will consider smoker to non-smoker reductions in year one, but no reclassification in the Preferred categories (PNT, NSP rates) until year two.

COME TO PRUDENTIAL FIRST.

Talk to us about why Prudential's retention limits and high automatic issue limits make us an ideal choice for your larger cases.

Underwriting Credit Opportunities

Prudential Financial strives to be competitive in impaired-risk underwriting. In an effort to maintain our competitiveness, Prudential continually expands its repertoire of underwriting credits. Underwriting credits are available for any face amount, issue age, product, and table rating. Credits are also available for smokers and non-smokers, and are designed to apply to far more of the business you submit to us and, therefore, generate more placed cases.

Crediting decisions are evidence-based decisions, using underwriting credits to offset “like” debits, based on test results or other favorable criteria, specific to a given applicant.

For example, we may use treadmill credits to offset overweight and blood pressure debits, or good blood sugar control to offset debits for diabetes. The result can be improvement on a standard or substandard offer, or possibly even improvement from a low substandard offer to a preferred non-smoker offer.

More than two dozen impairments are eligible for credits. Eligible impairments include:

IMPAIRMENT	Crediting Opportunities
Atrial Fibrillation	Credits may be available if there are no additional medical impairments, including known heart disease. Additional credits vary based on type of atrial fibrillation (chronic or paroxysmal), years of stability, a normal current NT-proBNP, and negative testing—including stress imaging with good exercise tolerance or a negative angiogram in the past year.
Blood Pressure	Credits may be available if echocardiogram results, done within the prior year, show normal left ventricular wall thickness. Additional credits may be available for a normal maximal treadmill ECG, done within the prior year, with normal blood pressure response to exercise. Maximum credits available for normal stress echocardiogram meeting above criteria.
Breast Cancer	Credits may be available for in-situ breast cancer, over age 40 at diagnosis, low-grade (1–2) malignancy, treated with resection, and good follow-up with normal annual mammograms.
Build	Credits may be available for ages 18 to 59 if there are no additional medical impairments and there is no evidence of metabolic syndrome (a group of abnormal findings related to the body's metabolism, including excess body fat, elevated lipids, low HDL cholesterol, borderline or elevated BP, and borderline or elevated blood glucose). Additional credits for all ages may be available for negative maximal treadmill, nuclear scanning, or stress echocardiogram testing done within the prior year.
Coronary Artery Disease	Credits may be available for a normal maximal treadmill ECG done within the prior year. Additional credits may be available for normal nuclear scanning or negative stress echocardiogram done within the prior year.
Diabetes	Available credits vary based on type of diabetes mellitus (type 1 or 2), treatment (diet, oral medication or insulin), age of onset, level of control, and other factors such as normal build, BP, and HDL.
EBCT (Electron Beam Computed Tomography)/ Ultra-Fast CT	Credits may be available if a follow-up nuclear scan is negative.

Underwriting Credit Opportunities (Continued)

IMPAIRMENT	Crediting Opportunities
ECG–Heart Blocks	Credits for first-degree block may be available for a normal treadmill or for two years of stability. For left bundle branch block, credits may be available for a negative nuclear scan or if the left bundle branch block has been present and stable for at least three years.
ECG–Major & Minor T Waves	Credits may be available for a normal EBCT (age 50 and over), or a normal maximal treadmill ECG. Additional credits may be available for normal nuclear scanning, catheterization, or stress echocardiogram. Resting echocardiogram credits may be available to offset major T waves. (All testing must be completed after the onset of the T wave changes.)
ECG–PVCs	Credits may be available if the applicant is under age 40, or for a normal EBCT (if insured is age 50 and up), or for a normal maximal treadmill ECG. Additional credits may be available if both a negative echocardiogram and exercise treadmill ECG were performed. (All testing must be completed after the onset of the PVCs.)
Elevated Liver Enzymes	Credits may be available if the insured is currently on certain medications known to elevate liver enzymes. Additional credits may be available for negative hepatitis screening or other specialized liver tests, if there has been no history or criticism of alcohol use.
Family History	Credits may be available if both parents live to age 70 or higher. Additional incremental credits may be available if both parents survive to age 75 and age 80.
Lipids	Credits may be available for a normal EBCT (if insured is age 50 and up), or a normal maximal treadmill ECG. Additional credits may be available for normal nuclear scanning or stress echocardiogram. Credits may also be available if the applicant is age 66 or older, or when higher HDL cholesterol levels result in lower ratios of total cholesterol to HDL cholesterol.
Malignant Tumors	Credits against table ratings (not against flat extra ratings) may be available for quality ongoing surveillance.
Pacemaker	Credits may be available for five years of stability since the pacemaker insertion. Additional credits may be available if there has been a normal maximal stress treadmill with normal nuclear scanning and a normal echocardiogram.
Rheumatoid Arthritis	Credits may be available for well-controlled rheumatoid arthritis if there are no flares of rheumatoid inflammation, with or without medication, for more than two years. Significant crediting is available when the duration of stability exceeds five years with no flares of rheumatoid inflammation, with or without medication.
Sleep Apnea	Credits may be available if a sleep study is available, there are no complications, no problems with blood pressure, no surgical treatment, and good control and compliance with CPAP (Continuous Positive Airway Pressure) machine.
Treadmill ECG	Credits may be available for normal nuclear scanning, exercise echocardiogram, or cardiac catheterization.

UNDERWRITING OVERVIEW

Foreign Travel Guidelines

The chart below indicates whether a life insurance application will be accepted for applicants who travel to the countries listed. These guidelines are based on analysis of government, travel services, and industry data, and may change depending on current conditions in the country. Guidelines may also vary depending on the application state. For countries not shown below, contact Underwriting. Please log on to www.pruxpress.com or PruLife Links for the latest country updates.

¹ The insurance regulations of some countries prevent their residents from purchasing life insurance outside their country of residence. Light blue text signifies that sales are prohibited due to insurance regulations. For more detail please contact your Prudential Wholesaler.

² OFAC: U.S. government restrictions prohibit life insurance sales to residents of these countries.

³ Due to Canadian regulations, available products are limited to UL (Plus and Protector), SUL (Protector), and Term (Essential, Elite and Return of Premium).

⁴ Specific regions in the following countries are rated differently than the remainder of the country:

- China Modern cities comparable to those in the West (e.g., Beijing, Chongqing, Guangzhou, Shanghai, Shenyang, and Tianjin) are considered B regions with the balance of the country a C region.
- India Residents and travelers to India will be considered depending on the region/city. Bangalore, Calcutta, Chennai, Delhi, Hyderabad, Mangalore, Mumbai, and Surat are considered B regions with the balance of the country a C region.
- Philippines Metro Manila will be considered a B region with the balance of the country a C region.
- Turkey Istanbul and Ankara will be considered B regions with the balance of the country a C region.

⁵ United Kingdom consists of England, Wales, Scotland, and Northern Ireland. Northern Ireland includes the counties of Tyrone, Fermanagh, Armagh, Dacon, Antrim, and Londonderry (also referred to as Derry), with the two principal cities of Belfast and Londonderry (Derry).

⁶ See Gaza Strip and West Bank.

Financial Underwriting Highlights

What Is Financial Underwriting?

Financial underwriting is the evaluation of a prospective insured's personal or business financial background and current economic situation. The analysis of an individual's financial situation takes place every time a case is underwritten, although the depth of this evaluation is based on the amount of insurance applied for. The purpose of this evaluation is to determine the proposed insured's need for insurance and make sure that the amount of insurance applied for is reasonable and in line with his or her needs.

Why Is Financial Underwriting Important?

Financial underwriting is important in order to prevent over-insurance. Over-insurance occurs when the amount of life insurance in force on an individual exceeds his or her economic—or “human life”—value. The primary purpose of life insurance is to provide funds to help replace the economic loss that results from the premature death of the insured person. If the amount of insurance carried on an individual exceeds any possible loss on the part of the beneficiary, it could be considered speculative, and it is not in the insured's or the company's best interest.

Insurable Interest

For a life insurance purchase to be valid, the beneficiary must have an insurable interest in the proposed insured. Insurable interest exists if the beneficiary benefits financially from the proposed insured's continued existence and would suffer a financial loss at the death of the insured.

Affordability

Affordability is an important factor that must be evaluated to determine if a product recommendation is suitable to meet a customer's needs. There are two basic relationships that Underwriting looks at in evaluating whether a client will be able to sustain the premiums:

Premium-to-Income Relationship. In conjunction with the Income Factor Tables (refer to the Income Factor Tables section of this highlighter for the tables), the relationship of premium outlay to the proposed insured's gross annual income is considered. A good rule of thumb is that the total premium outlay for all life insurance policies supported by the premium payer's income should not exceed 10% of the premium payer's pre-tax income. In certain situations, it may be acceptable, from a financial underwriting perspective, for premiums to be as high as 20%. If you feel such a case is warranted, contact Underwriting before submitting an application for insurance. Be sure to provide Underwriting with a cover letter outlining why you believe the need and amount of coverage are warranted and why the premiums are affordable.

Premium-to-Liquid-Net-Worth Relationship. If the premium to pre-tax income relationship is greater than 10%, premiums may need to be paid from a client's liquid assets. In that case, it becomes necessary to consider whether the premium payer's liquid net worth is sufficient to sustain the premiums and whether this is an appropriate use of these assets. The answers to these questions will depend on the proposed insured's overall financial situation. A good rule of thumb is that the premium should not exceed 25% of the premium payer's liquid net worth.

Amount of Insurance

Underwriting will also evaluate how the amount of insurance being requested was determined. Results from a comprehensive needs analysis, or recommendations from an accountant, attorney, or other advisor, can make a difference when evaluating the case. If the proposed insured simply told you how much insurance he or she wanted to purchase, you should determine if that amount of insurance is reasonable and convey that information to Underwriting.

When determining the overall amount of insurance that will generally be granted to an individual, the underwriters take into account any existing insurance coverage he or she already has in force and any insurance being applied for with other companies.

A complete needs analysis takes these factors into account and is an important and useful tool in helping the producer, the client, and the underwriter understand how much insurance is required and why. (Note: A Financial Supplement form is required for all applications with face amounts of \$5,000,000 or more if the case was submitted with a new application.)

In most situations, the amount of insurance applied for should be directly related to the need the life insurance was purchased to satisfy, such as to replace lost income, or cover a debt such as a mortgage or small business loan. From an underwriting point of view, insurance purchased for the following reasons is generally acceptable:

- ▶ Last expenses
- ▶ Income replacement/survivors' income
- ▶ Debt repayment (e.g., mortgage or college loans)
- ▶ Estate settlement
- ▶ Income in Respect of a Descendent (IRD)
- ▶ Insurance to address business needs

While life insurance has other specialty uses such as cash value accumulation, the primary purpose must be for death benefit protection.

Financial Underwriting Highlights (Continued)

Income Replacement

A client's income is one of the factors looked at in determining the amount of insurance that will be granted for income replacement. An individual's total income can be comprised of earned and unearned income.

Earned income is defined as income that will normally cease upon the death of the insured, such as salaries, pensions, Social Security, and cash distributions from a business. Life insurance may be considered as a means to replace lost earned income upon the death of the insured.

Unlike earned income, unearned income does not cease upon the death of the insured. Unearned income includes pure investment income and distributions from 401(k) plans and IRAs. Life insurance may be needed to cover any potential tax liability on this unearned income upon the insured's death. (Refer to the “Amount of Insurance” section of this highlighter for additional information.)

Unearned income increases one's ability to pay premiums and may be available to help offset some of the financial losses the survivors may experience. However, these available proceeds may decrease the need for insurance after the potential tax liability has been taken into consideration.

A software-generated income needs analysis can be useful in determining the amount of income that should generally be replaced by life insurance.

Needs typically covered by income protection include mortgage protection, education needs, and providing continuing income to support dependents upon the death of the insured.

Sources of Information

In most cases, the information received during the client interview is sufficient to determine if the amount of insurance applied for is appropriate. For very large or complex cases—including estate settlement or business

situations—more extensive information may be required. These cases involve higher risks and require the evaluation of more than just income and ability to pay. It may, therefore, be necessary to submit financial documents that are generally not required for smaller amounts of coverage. In these situations, Underwriting is looking for information that will substantiate the amount of insurance being applied for. The information should answer such questions as:

- ▶ What is the purpose of the insurance?
- ▶ How was the amount of the insurance applied for determined?
- ▶ Who will be the policyowner and premium payer?
- ▶ What is the current amount of in-force and applied-for insurance?

The proposed insured, as well as his or her advisors, attorneys, or accountants, may also be required to submit documentation to support the need for the amount of insurance requested. This documentation may include personal or business financial statements such as W-2 forms or tax returns, employment contracts, loan or trust agreements, and buy-sell agreements. It is always a good idea to inform clients, attorneys, accountants, and other financial advisors that they may be required to provide additional information. This type of financial documentation is required on face amounts of \$10,000,000 or more.

Summary

The most important source of information about a proposed insured is you. As you analyze a potential client's insurance needs, you gain knowledge of his or her worth and income. Any pertinent information should be communicated to Underwriting. It may be advisable to submit a cover letter to Underwriting that explains how the amount of insurance requested was determined. Any documentation used during this process should be included with the cover letter.

The Confidential Financial Questionnaire may be used to capture some of this financial information. The extent of this information depends on the amount of insurance you are recommending and the purpose for which it is intended.

INCOME FACTOR TABLES

The following Income Factor Table is a guide to the maximum amount of insurance (excluding group coverage) that is generally acceptable in relation to the earned income of an individual with or without dependents. To use the Income Factor Table, multiply the proposed insured's earned income by the corresponding factor based on his or her age at the time of application.

AGES	INCOME		FACTOR		AMOUNT OF INSURANCE
to 40	\$	X	35	=	\$
41-50	\$	X	25	=	\$
51-60	\$	X	20	=	\$
61-70	\$	X	10	=	\$
71-80	\$	X	0	=	\$

UNDERWRITING OVERVIEW

Age and Amounts Requirements

The guidelines in the chart below apply to the amount applied for and any amount applied for in the past two years. For Survivorship coverage, requirements are based on 50% of the face amount applied for, along with 50% of the rider.

The age and amount requirements apply to products with Preferred Underwriting categories. Data verification reports and requirements and paramed exam limits and procedures apply to all Life products. The minimum face amount for individuals over age 80 is \$250,000. Exceptions to \$200,000 may be permitted—call the underwriter. Minimum face for ages 76–80 is \$100,000. MD exams may be required based upon underwriter discretion.

¹ Minimum face amounts: Ages 76–80: \$100,000; Ages >80: \$250,000. (Face amounts of \$200,000 may be considered as an exception—contact Underwriting.)

² Please refer to Attending Physician's Statement Requirement Guide (0210258) for additional APS requirements.

Age and Amounts Requirements (Continued)

REQUIREMENTS LEGEND

EXAM
The examiner is a paramed, not an MD. He or she weighs and measures the proposed insured and takes blood pressure and pulse.
A Modified Exam is required for submissions via Express Worksheet. Tele-underwriting Interviewer obtains the Part 2 Medical Declarations.
Full Exams are required for submissions via paper application. The examiner obtains the Part 2 Medical Declarations.
APS
APS Attending Physician Statement ²
ECG Electrocardiogram
IRP Insurance Risk Profile (Comprehensive Blood and Urine Panel)
UHIV Urine HIV Testing—Examiner-collected urine specimen for states listed above for HIV testing
SPEC Urine Specimen
MVR Motor Vehicle Report
<i>In addition to the lab slip, please submit any required state-specific HIV consent form.</i>
DATA REQUIREMENTS (PRUDENTIAL TO ORDER WHEN REQUIRED)
Attending Physician Statement required for all ages:
PADR (Prudential Automated Database Report) Face amount: \$250,000–499,999 for Traditional Paper Application submissions Face amount: \$500,000–999,999 for Tele-underwriting Worksheet submissions
DVR (Data Verification Report) Face amount: > \$499,999 for Traditional Paper Application submissions Face amount: > \$999,999 for Tele-underwriting Worksheet submissions

² Please refer to the Attending Physician's Statement Requirement Guide (0210258) for additional APS requirements.
